Physician Inpatient Admitting and Visits

Summary

The physician inpatient admitting and visits incentive will consist of two levels with a total pool of approximately \$850,000. The amount available per quarter is \$212,500. The incentive’s purpose is to supply further payment (beyond the rate) to PCP’s that provide inpatient admitting and care as well as to incentivize PCP’s to admit and visit their panel member while in an inpatient setting. The first payment will be made April 2009 based on dates of service between October 1, 2008 and December 31, 2008 with paid dates through March 31, 2009.

Criteria

Level I: All qualifying PCP’s that admit and visit members in an inpatient setting (procedure codes 99221 – 99239) will receive up to an additional 25% of the rate for the procedure code according to the current fee schedule (unenanced). This percent increase is contingent on available funds and may be less.

Level II: This incentive is designed to provide additional compensation for qualifying PCP’s when they visit/admit members **on their panel**. Each PCP will be compared to the average percentage of all PCP’s that participate in their member’s inpatient care. To qualify, any individual PCP must be above the average of all PCP’s or above 20%; whichever is less. All providers that qualify will receive an additional \$20 per inpatient admit/visit. This additional amount is contingent on available funds and may be less.
